

SAIF ULLAH

Enterprise Solutions Consultant | Banking Technology | AI & Automation | Digital Transformation

Muscat, Oman · Saif.pro.ds@gmail.com · +968 96248833 · linkedin.com/in/saif-ullah-1754b086

PROFESSIONAL SUMMARY

Enterprise Solutions Consultant with 8+ years of experience delivering enterprise-scale banking and self-service technology solutions across the Middle East and South Asia (11+ years of combined industry, research and internship experience since 2015). Experience spans enterprise software implementation, ATM and self-service banking technologies, system integration, automation, production support and root-cause analysis within mission-critical environments. Maintains a strong focus on Artificial Intelligence, Data Science, Machine Learning and intelligent automation, including Generative AI, RAG architectures and vector databases. Gold Medalist in Computer Science and published researcher with work presented in IEEE and ACM-related venues.

TOP SKILLS

Vector Databases · Enterprise Software Implementation · Banking Technology · Generative AI & RAG · .NET / C# / SQL Server · Apache Spark & Hive · L2/L3 Production Support & RCA

PROFESSIONAL EXPERIENCE

Technical Consultant

October 2018 – Present

NCR Atleos · Muscat, Oman

- Delivered enterprise-scale software implementations, customization, deployments and production support for banking and self-service technology solutions.
- Supported ATM, cash recycling and self-service platforms across implementation, testing, rollout and post-production support phases.
- Performed advanced troubleshooting and root cause analysis across application, database, infrastructure, operating system and integration layers.
- Collaborated with customers, engineering teams and business stakeholders to resolve complex production issues and improve system reliability.
- Developed automation and optimization solutions that reduced manual effort and enhanced operational efficiency.
- Supported software upgrades, release activities, validation testing and production deployments in high-availability environments.
- Assisted in enterprise integration initiatives involving applications, databases, middleware and third-party systems.
- Explored practical applications of AI, analytics and intelligent automation to improve operational processes and solution delivery.

Big Data and AI Developer

May 2018 – October 2018

Technology Incubation Center, NUST · Islamabad, Pakistan

- Designed and implemented Big Data solutions using Apache Spark, Hive and distributed data processing platforms.
- Developed data pipelines and analytics solutions for large-scale datasets.
- Implemented cybersecurity analytics and threat intelligence solutions using Apache Metron.
- Built machine-learning-ready datasets and supported data science initiatives.
- Delivered technical training sessions in Data Science, Machine Learning and Big Data technologies.

Research Assistant

August 2016 – October 2016

National Textile University · Pakistan

- Development of a scalable Hadoop cluster.
- Research on Big Data and cluster scalability.

Intern

June 2016 – July 2016

Huawei · Shenzhen, China

- Hands-on training in Huawei core software development.
- Completed a short Chinese language course at Beijing Language and Culture University (BLCU).

Software Trainee

August 2015 – November 2015

Mahmood Group of Industries · Multan, Pakistan

- Database administration.
- Data preparation and reporting.

EDUCATION

Bachelor of Science, Computer Science

National Textile University, Pakistan | 2013 – 2017 | CGPA 3.86/4.00 — Gold Medalist
