PROFESSIONAL SUMMARY

Enterprise Solutions Consultant with 8+ years of experience delivering banking and self-service technology solutions across the Middle East and South Asia. Experienced in enterprise software implementation, ATM and cash recycling platforms, system integration, automation, L2/L3 production support and root-cause analysis in mission-critical environments. Combines this with a strong focus on AI, data science and intelligent automation, including Generative AI, RAG architectures and vector databases. Gold Medalist in Computer Science and published researcher with work presented at IEEE and ACM-related venues.

CORE SKILLS

Banking & Self-Service	ATM / CDM / cash recycling platforms · NCR APTRA · EMV · Enterprise software implementation · System integration
Engineering & Data	C# / .NET · SQL Server · Apache Spark · Hive · Hadoop · Data pipelines
AI & Automation	Generative AI · RAG architectures · Vector databases · Intelligent automation
Support & Delivery	L2/L3 production support · Root-cause analysis · Release, upgrade & deployment validation

PROFESSIONAL EXPERIENCE

Technical Consultant

October 2018 – Present

NCR Atleos · Muscat, Oman

- Deliver enterprise software implementations, customization, deployments and production support for banking and self-service solutions, from implementation and testing through rollout and post-production support.
- Perform advanced troubleshooting and root-cause analysis across application, database, infrastructure, operating system and integration layers, working with customers, engineering teams and stakeholders to resolve complex production issues and improve reliability.
- Support ATM, cash recycling and self-service platforms, including software upgrades, release activities, validation testing and production deployments in high-availability environments.
- Contribute to enterprise integration initiatives involving applications, databases, middleware and third-party systems.
- Develop automation and optimization solutions that reduce manual effort and improve operational efficiency.
- Explore practical applications of AI, analytics and intelligent automation to improve operational processes and solution delivery.

Big Data and AI Developer

May 2018 – October 2018

Technology Incubation Center, NUST · Islamabad, Pakistan

- Designed and implemented Big Data solutions using Apache Spark, Hive and distributed data processing platforms.
- Developed data pipelines and analytics solutions for large-scale datasets, and built machine-learning-ready datasets to support data science initiatives.
- Implemented cybersecurity analytics and threat intelligence solutions using Apache Metron.
- Delivered technical training sessions in Data Science, Machine Learning and Big Data technologies.

Research Assistant

August 2016 – October 2016

National Textile University · Pakistan

- Developed a scalable Hadoop cluster and researched Big Data and cluster scalability.

Intern

June 2016 – July 2016

Huawei · Shenzhen, China

- Hands-on training in Huawei core software development.
- Completed a short Chinese language course at Beijing Language and Culture University (BLCU).

Software Trainee

August 2015 – November 2015

Mahmood Group of Industries · Multan, Pakistan

- Database administration, data preparation and reporting.

EDUCATION

Bachelor of Science, Computer Science

2013 – 2017

National Textile University, Pakistan • CGPA 3.86/4.00 • Gold Medalist

CERTIFICATIONS

IBM	Vector Databases for RAG: An Introduction • Develop Generative AI Applications: Get Started • Build RAG Applications: Get Started • Data Science for Business – Level 1 • Data Science Foundations • Big Data Foundations
Google	Google AI • AI Fundamentals • AI for Content Creation • AI for Data Analysis • AI for Writing and Communicating • AI for Research and Insights • AI for Brainstorming and Planning
Coursera	Windows Server Management and Security • Getting and Cleaning Data • Introduction to Cyber Attacks • The Data Scientist's Toolbox
Big Data University	R Programming • Machine Learning • Data Science • Data Science Methodology • Big Data
