Professional Summary

Senior Technical Consultant with 8+ years of experience delivering enterprise-scale technology solutions across banking and telecom environments, with a strong focus on highly regulated and mission-critical operations. Specialized in .NET-based application platforms, L2/L3 production support, large-scale deployments, and operational support for ATM, CDM, and SR ecosystems.

Experienced in diagnosing and resolving complex multi-layered issues across application, database, middleware, and infrastructure stacks, ensuring service availability, operational continuity, and timely incident resolution. Strong client-facing background supporting Tier-1 banking institutions through critical incidents, system upgrades, platform stabilization, and production readiness activities.

Additional expertise in modern data and AI technologies, including Generative AI, Retrieval-Augmented Generation (RAG), Apache Spark, Hive, Python, and R, with a practical focus on automation, analytics, and data-driven decision-making.

Core Technical Skills

Application Development: C#, .NET Framework, ASP.NET, SQL Server

Enterprise Infrastructure: Windows Server, IIS, system deployment, configuration management, troubleshooting

Production Support: L2/L3 support, incident management, root cause analysis, service restoration, SLA-driven support

AI & Data Platforms: Generative AI, RAG architectures, Apache Spark, Hive, Python, R

Integration & APIs: REST, SOAP, SoapUI

Tools & Platforms: Visual Studio, SQL Server Management Studio (SSMS), PyCharm

Professional Experience

Technical Consultant – NCR Corporation / NCR Atleos

Oman | Oct 2018 – Present

- Deliver end-to-end implementation, configuration, customization, and production support for enterprise banking systems deployed across ATM, CDM, and SR platforms.
- Provide L2/L3 support for mission-critical environments, troubleshooting complex issues across application, database, middleware, device integration, and infrastructure layers.
- Serve as a primary technical escalation point for high-severity incidents, driving rapid service restoration and minimizing business impact.
- Perform application deployments, upgrades, configuration changes, and production fixes using C#/.NET and SQL Server in controlled enterprise environments.
- Analyze application logs, XFS logs, EJ data, system events, and transaction traces to identify root causes and prevent recurring incidents.
- Coordinate with customers, vendors, engineering, and operations teams to support platform stability, compliance, and operational readiness.
- Support Tier-1 banking customers while maintaining SLA commitments, uptime expectations, and regulatory requirements.

Big Data Consultant – ABC Data

Pakistan | Jan 2018 – Oct 2018

- Designed and implemented distributed data processing solutions using Apache Spark and Hive.
- Developed data ingestion, transformation, and analytics pipelines for enterprise datasets.
- Supported data monitoring, quality checks, and security-related initiatives.
- Delivered technical training sessions on big data, analytics, and data processing platforms.

Key Achievements

- Stabilized production banking platforms by resolving recurring critical incidents and improving operational reliability.
- Played a key role in deployment, upgrade, and production readiness activities across live enterprise environments with minimal downtime.
- Improved troubleshooting efficiency through structured root cause analysis, log-based diagnostics, and repeatable support practices.
- Recognized as a trusted technical escalation resource for complex enterprise production issues.

Certifications

AI & Data Certifications

- Develop Generative AI Applications – IBM
- Build RAG Applications – IBM
- Artificial Intelligence – Google
- Data Science Foundations – IBM
- Big Data Foundations – IBM

Additional Certifications

- Machine Learning, R Programming – Big Data University
- Data Science Methodology – Big Data University
- The Data Scientist's Toolbox – Coursera
- Introduction to Cyber Attacks – Coursera

Education

BS Computer Science

National Textile University, Pakistan | 2013–2017

CGPA: 3.86/4.00 | Gold Medalist

Publications

- Application of Data Science for Controlling Energy Crises – ICSCA 2019 (ACM)
- Agent-Based Model for Diffusion of Smart Grid Technology – ICET 2018 (IEEE)
- Mobile-Based Solution for Automation of Knitting Calculations – ETK 2018
